

MIG50Q7CSB1X (1200V/50A 7in1)

High Power Switching Applications

Motor Control Applications

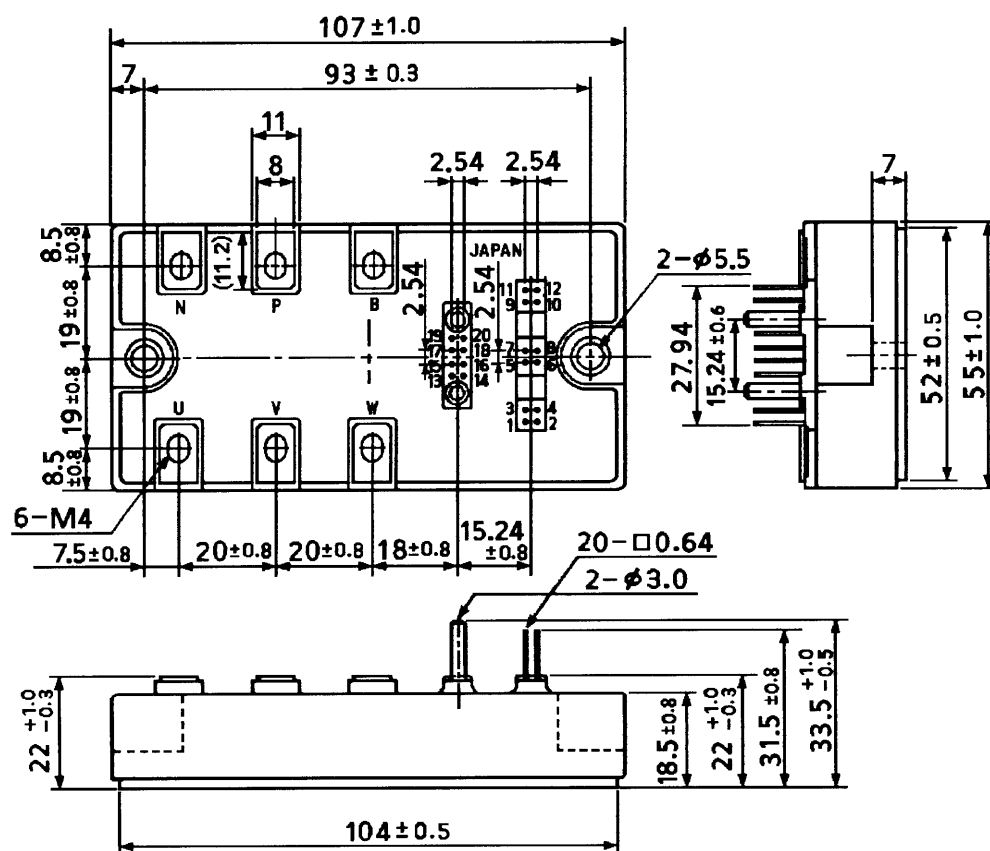

- Integrates inverter, brake power circuits and control circuits (IGBT drive units, protection units for short-circuit current, over current, under voltage and over temperature) in one package.
- The electrodes are isolated from case.
- $V_{CE(sat)} = 2.2 \text{ V (typ.)}$
- UL recognized File No. E87989
- Weight: 278 g (typ.)

Equivalent Circuit

Package Dimensions: TOSHIBA 2-108G1A

Unit: mm
